

Carbon Monoxide (CO):

Lake State Inspection provides a service to determine if furnace or water heaters are releasing harmful levels of carbon monoxide.

Since carbon monoxide is odorless, a person or an entire family may not recognize that carbon monoxide is poisoning them.

LSI has testing equipment for carbon monoxide.

See "Price" page for testing costs.

Call our office telephone number at the bottom of this page or order on line.

For extensive information on carbon monoxide (CO) visit:

United States Environmental Protection Agency
