

Mold:

Lake State Inspection provides services to sample if mold is present in a home.

Exposure to bacteria and fungus in indoor air has emerged as a significant health problem in some residential and occupational environments.

Some molds can create a large range of health problems depending on the exposure and tolerance of the individual.

The health related problems associated with exposure to mold range from allergic reactions, to respiratory tract inflammation and infection.

LSI has sampling equipment for Mold.

The laboratories we use can take up to 3-5 working days for results.

See "Price" page http://www.lsillc.net/pricing_information.htm for testing costs or call our office telephone number at the bottom of this page or order sampling line at http://www.lsillc.net/order_inspection.htm
